- Refinement: Adjustments are made to achieve desired chemical composition.

Advantages:

- High efficiency and large-scale production.
- Lower cost per ton.

2. Electric Arc Furnace (EAF)

This method is more flexible and is often used for recycling scrap steel.

Steps involved:

- Scrap Collection: Steel scrap or direct reduced iron (DRI) is gathered.
- Melting: An electric arc generates intense heat to melt the scrap.
- Refining: The molten steel is refined by adding alloying elements.
- Casting: The steel is cast into molds or continuous cast into slabs.

Advantages:

- Environmentally friendly due to recycling.
- Suitable for producing specialty steels and small batches.
